Professional Summary

Software Engineer with 2+ years building cloud security infrastructure, specializing in identity management, multi-cloud data collection and ingestion, and enterprise SSO. Track record of owning complex features end-to-end, with deep integration of agentic AI tooling across the development lifecycle.

Skills

Languages & Technologies: Go, TypeScript, JavaScript, Python, Java, SQL, React, Tailwind CSS, Flask, Node, Electron, REST, GraphQL, gRPC/Protobuf, SAML, OIDC, SCIM

Tools & Platforms: AWS, Azure, GCP, Git, GitHub Actions, CircleCI, Docker, Kubernetes, Helm, Flux, Terraform, Auth0, NewRelic, OTel

AI Tooling: Agentic AI development workflows, agent skills, Claude Code, OpenCode, MCP

Work Experience

- Sonrai Security** Fredericton, New Brunswick
Software Engineer · Full-time May 2025 - Present
 - Designed and implemented full-stack Azure onboarding, including frontend flows, backend gRPC services, SQS/EventBridge job scheduling, and an onboarding verification test suite
 - Led the research, design, and implementation of Azure persistent audit using Kafka consumers with horizontal autoscaling based on consumer lag
 - Implemented enterprise SSO and SCIM pipeline, including SAML/OIDC integration, self-service SSO configuration, group-based RBAC, and a standalone SCIM server in Go for user and group provisioning
 - Hardened GCP and AWS cloud onboarding to help secure the company's first GCP customer and a major enterprise AWS deal
- University of New Brunswick** Fredericton, New Brunswick
Embedded Design Student Developer · Part-time Jan. 2025 - May 2025
 - Developed and designed a cross-platform desktop application for the UNB Harvest Competition with real-time monitoring, scoring, and cloud integration for 20+ rovers
- Sonrai Security** Fredericton, New Brunswick
Junior Software Engineer · Co-op Jan. 2023 - Aug. 2023, May 2024 - Aug. 2024
 - Implemented customer feature requests and resolved production issues across AWS, Azure, and GCP cloud collectors, including optimizing Azure AD collection for an environment with 1M identities
- Cedar Groves Executive Par 3 & Driving Range** Saint John, New Brunswick
Full Stack Developer · Freelance Dec. 2022 - Apr. 2023
 - Designed and developed a full-stack website for a local golf course, serving 500+ monthly visitors

Education

- University of New Brunswick** Fredericton, New Brunswick
Bachelor of Science in Software Engineering Sept. 2020 - May 2025
 - President of Software Development Club
 - Engineering Competitions (Programming Division): 3-time National Finalists (CEC), 3-time Atlantic Champions (AEC), and 3-time Regional Champions
